Mr. Gary Baughman, Section Chief
Colorado Department of Health
Hazardous Materials and Waste Management Division
HMWMD-HWC-B2
4300 Cherry Creek Drive South
Denver, CO 80222-1530

Dear Mr. Baughman:

The U.S. Department of Energy, Rocky Flats Office is requesting a change to interim status for Resource Conservation Recovery Act Unit 25 (750 Pad), pursuant to 6 CCR 1007-3, Part 100, Section 100.20(b)(2). The requested change is to allow for storage of investigation derived material (e.g. soil, bedrock and drilling fluids) to be generated as the result of remediation and closure activities being performed for the Solar Evaporation Ponds (SEP). As previously discussed with you over the phone, the capability to store approximately 20 drums of investigation derived material on the 750 Pad along with the pondcrete and saltcrete is needed. All necessary waste codes are currently contained in the existing Part A. A request for change to interim status for all SEP cleanout activities including tank storage on the 750 Pad and a revised Part A will be transmitted to you shortly. As these drums are currently in 90 day storage, we are requesting approval from your office as soon as possible.

If you have any questions, please contact me at 966-4561, John Rampe at 966-6246 or Debbie Mauer at 966-5598.

Sincerely,

for John D. Wienand
Thomas E. Lukow, Director
Waste Programs Division
